

An introduction to Project Management

In today's world all businesses are under constant pressure to evolve and improve in order to maintain or enhance their standing in the market of their choice. Business transformation is an ongoing challenge, whether those changes are in small iterations or major company-wide initiatives the success or failure of any given project may well stand or fall on the capability of the appointed team. Change for change's sake is not an option in most businesses, so if an area for improvement has been identified and the business case makes sense, then it is vital to get the right team in place.

Our team at Opticore pride themselves in identifying, recruiting and supporting **Project Management** resources that can deliver. Our track record stands testament to our success in this area. It is more important than ever for businesses to partner with a supplier that understands these challenges and has the capability to support the flexibility that project management requires.

Six benefits of Opticore's Project Management Service to your company

IR35 Compliant

Our Project Managers are **trained and certified at an industry standard**. Opticore are aware that IR35 compliance is challenging for clients and therefore will **guarantee that all our resources are IR35 compliant**.

Onboarding Costs

Onboarding new resources can be costly and time-consuming for any company. **Opticore will absorb all these costs as part of our service.**

Flexible Resources

Opticore can **flex the resource pool** according to your project backlog and the skills required. This includes the ability to **deploy resources on a part-time basis**.

Rapid Deployment

Initiating projects is often delayed due to a lack of available and suitably qualified Project Management resources. **Opticore will be able to deploy resources to site rapidly.**

Site Knowledge

Opticore will gain an understanding of the **personnel, processes, systems and culture** of our clients and retain and socialise this information to the Opticore Team.

Reduced Operational Costs

By **outsourcing the project management** function our clients can **gain operational efficiencies**, reduce management overhead and **eliminate recruitment costs**.

Business Challenges and PMaaS Resolutions

Clients frequently express common concerns around the challenges they face when delivering against their initiatives. Regardless of the challenge, **Opticore PMaaS** will embed effective support, insight and continuous improvement practices to ensure a resolution can be implemented. Often these challenges share the same top level key attributes.

Challenge One:

Trust and Assurance

Clients may not trust their project data and analytics. This leads to reduced confidence when making critical decisions with incorrect expectations being set.

PMaaS Resolution:

PMaaS will aim to offer peace of mind through reports built on solid data through persistent analysis. Through this data, assurance will be established and expectations managed correctly via concise reporting.

Challenge Two:

Risk Management

In most projects risk is most often overlooked and even when mitigation is highlighted, it is not often put into practice by staff and clients.

PMaaS Resolution:

PMaaS will deliver extensive and effective risk management ensuring the correct insight to the real risks & issues that the projects are facing end-to-end.

Challenge Three:

Visibility, Control & Direction

Clients stakeholders often lose visibility of how their projects are being run day-to-day leading to a lack of control over key decisions, stakeholder management and budgets.

PMaaS Resolution:

PMaaS will deliver real-time reporting to key stakeholders to enable them to make informed decisions at critical points in the delivery cycle and thus ensure that projects remain on track and delivers the desired outcomes.

About Opticore

Opticore provide skilled Network, Wireless, Security and Project Management resources to enable the Design, Architecture, Implementation, Support and Delivery of complex technical solutions.
